ABOUT ME

I am a fresh graduate in Computer Engineering from Pasundan University with a profound passion for software engineering. My practical experience includes proficient use of PHP for Laravel implementation and expertise in JavaScript for both Frontend and Backend web development. In my most recent project, I actively participated in hands-on work with JavaScript. I am enthusiastic about applying my academic background and practical skills to real-world projects, staying current with industry trends and technologies to contribute effectively to the dynamic field of software engineering.

PROJECT EXPERIENCE

Pasundan University, Bandung | Frontend & DevOps | Cibeureum Market Project

Jan 2023 – Jul 2023

- Implemented the prototype design into ReactJS to create a dashboard.
- Configured VPS to run the implementation and assisted the backend in deploying it to the server, including database preparation.

Pasundan University, Bandung | Backend & DevOps | E-Waste Project

Feb 2022 – Aug 2022

- Designed the backend system according to specified requirements.
- Implemented the design into the backend using ExpressJS as a REST API framework.
- Configured VPS using Docker for deployment, making both backend and frontend containerized.

PT Digital Transformation Key, Bandung | UI/UX Designer

Sep 2022 – Jan 2022

- Designed application web dashboards using Figma as a reference.

EDUCATION

Pasundan University | GPA: 3.72

2019 – 2023

- Studied system design, software engineering, IoT, networking, and basic machine learning.

Bangkit Academy

Feb 2022 – Jul 2022

- Learned server management using Google Cloud Platform, and studied Saas, Paas, IaaS, Containerization, Kubernetes, and machine learning.

SKILLS

- | | |
